## **ABOUT YELLOW HIRE**

Established in 2015, Yellow Hire is a specialist equipment supplier servicing projects across Victoria, New South Wales, South Australia and Queensland. We pride ourselves on being a forward thinking group of people who understand the key needs of contractors when renting equipment from a plant hire company. Our mission is to help you keep “Getting It Done!”

With continual investment in our fleet, we have grown to include more than 275 items of quality plant and equipment. Our fleet covers earthmoving machinery, compaction machinery, site support machinery, cranes and heavy haulage machinery.

### **Leader Cranes & Logistics**

Yellow Hire's involvement in the crane & logistics sector began in January of 2021 with the acquisition of Leader Cranes and Logistics (formerly Saunders Crane Hire). Operating as a division of Yellow Hire, Leader Cranes offers tailored crane hire and logistics agreements for various industries in Regional Victoria and NSW.

# WHY YELLOW HIRE?

## 1. OUR TEAM

As a family owned company we pride ourselves on being a forward thinking group of people who understand the key needs of our customers when renting equipment from a plant hire company. While the services we provide are similar to that of so many other companies, our core difference is in our team; a team that is 100% committed to supplying the best solution for every customer.

## 2. EASE OF USE

At Yellow Hire, we believe in keeping it simple. From our easy to read invoicing with no hidden fees to our quick trading account setup, we aim to take the hassle out of hiring. Through many years of experience in the earthmoving and heavy equipment industry our team remains focused on being easily contactable at all times to help you keep "Getting It Done!"

## 3. QUALITY EQUIPMENT

Well maintained equipment is one of the keys to many successful projects. All equipment in our fleet is maintained in line with stringent servicing and maintenance guidelines, therefore we can ensure every customer has the best possible chance of success on their project. Our strategically located workshops allow our team members to inspect, diagnose and repair equipment quickly and efficiently.

# REPAIR & MAINTENANCE

Having the ability to provide an effective field service team to our customers is one of the keys to our high customer satisfaction rate. With our construction equipment operating in all types of harsh conditions, on occasion the machinery does fail. Having

full access to our field service team, we are able to attend site to rectify these issues quickly and efficiently. All assets are fitted with GPS monitoring devices that allow our in-house service team to track and monitor critical data such as service

intervals, current hours and location. We understand that equipment maintenance can make or break your operation, because of this our team visit site regularly to provide preventative maintenance and machine inspections.

# HEAVY HAULAGE & LOGISTICS

## IN HOUSE HEAVY HAULAGE

Transporting both small and large equipment to and from the construction site is one of our main considerations when renting equipment. This is why we operate our own in-house heavy haulage and logistics division.

We offer transport solutions to all customers and are capable of carrying loads up to 50 tons. Utilising our external transport partners we can further extend our capabilities to 100 tons.

## ON TIME, EVERY TIME!

Our transport equipment includes heavy rigid crane trucks, tri-axle drop deck trailers and quad axle floats and dollies. We aim to ensure that our equipment is delivered “On Time, Every Time” as promised.
