C-SERIES

HYDRAULIC EXCAVATORS

POWERFUL AND FUEL EFFICIENT ENGINE

The C-Series Hydraulic Excavators are powered by Tier 4 Interim - certified Isuzu Engine with CEGR (cooled exhaust gas recirculation) and one-piece diesel particle difusor (DPD) that burns cleaner while delivering superior horsepower.

The combination of engine technology and Advanced Hydraulic System grants **10% of fuel economy**.

Automatic self-regeneration of the diesel particulate diffusor (DPD) ensures no loss of productivity, while low engine rpm, improved hydraulic pump control and five new energy saving systems boost fuel economy by up to 10%.

A green economy gauge can be activated in the cab to inform the operator of the most economical settings for the machine, reporting fuel consumption in real-time.

ADVANCED ENERGY MANAGEMENT

- **POWER SAVE:** the pump discharge pressure when the machine is at rest.
- **PUMP TORQUE CONTROL:** prevents drop in engine rpm when lifting heavy loads.

Less fuel consumption and effective energy usage thanks to the **5 ENERGY SAVING FUNCTIONS:**

- **BEC - Boom Economy Control:** it increases the fuel efficiency during the lowering of the boom and swing operations;
- **AEC - Automatic Economy Control:** it reduces the rpm when the joysticks are in neutral position;
- **SRC - Swing Relief Control:** the pump sends a small amount of oil at the very beginning of the slewing operations;
- **SSC - Spool Stroke Control:** automatic pressure adjustment during digging and leveling;
- **AES - Auto Energy Safe:** Auto Idle and Idle Shut Down.

HIGH RELIABILITY

Improved design for durable performances

The new boom and arm are Heavy Duty, more robust and reinforced in the more stressed areas, optimising the durability and the performances at the same time: the boom is average 8% lighter than the previous series.

HD booms and arms are standard, to grant the maximum reliability also in the toughest applications.

Increased productivity: extra lifting capacity thanks to the front attachment optimisation;

Maximum efficiency: lighter, but stronger front attachment (more lifting, less fuel consumption);

Higher resale value: re-designed attachment for more durability and less maintenance cost.

ROBUSTNESS

The C-Series Hydraulic Excavators undercarriage is made with high quality components, with thick structural plates in the areas where components required and higher level of resistance.

Heavy duty solutions

The Heavy duty undercarriage ensures safe and productive performance on all terrains.

- X-chassis design to grant a better weight distribution and a superior stability;
- Heavy duty and high quality material;
- Heavy duty travel engine protection;
- Extra heavy duty carrier roller brackets.

* Lift capacities are taken in accordance with SAE J1097 / ISO 10567 / DIN 15019-2

Lift capacities shown in kg do not exceed 75% of the tipping load or 87% of the hydraulic lift capacity

Capacities that are marked with an asterisk (*) are hydraulic limited

If the machine is equipped with a quick coupler, subtract the weight of the quick coupler from the load shown in the table to calculate the real lift capacity
