RENTAL EQUIPMENT FOR QUARRYING, MINING AND CONSTRUCTION

ABOUT YELLOW HIRE

Established in 2015, Yellow Hire is an equipment supplier servicing projects across Victoria, New South Wales, South Australia and Queensland. We pride ourselves on being a forward thinking group of people who understand the key needs of contractors when renting equipment. Our mission is to help you keep “Getting It Done!”

With our large fleet, we have grown to include quality plant equipment. Our fleet cover earthmoving, site support, access and power solutions.

Who Is AIH

Yellow Hire is powered by AIH, an industrial equipment solutions company supporting construction, mining, quarrying, agricultural and heavy industry across Australia & beyond.

We bring together equipment rental, power generation solutions, heavy equipment maintenance and components, tyre & rim services and heavy manufacturing to support complex, high-demand operations.

Built on strong regional foundations, AIH combines local responsiveness with a national and international network to deliver contractors and operators reliability, experience and a partner they can count on to keep their operations moving.

WHY YELLOW HIRE?

OUR TEAM

Yellow Hire is built on experience. Our team is hands-on, responsive and deeply familiar with the equipment we supply and the environments it operates in. From first call to equipment return, you're dealing with people who understand your job, your timelines and what's at stake on site. Practical advice, clear communication and support you can rely on, every time.

EASE OF USE

Hiring equipment shouldn't slow your project down. At Yellow Hire, we make the process straightforward, transparent and efficient.

From fast account setup and clear invoicing to flexible hire options and responsive communication, we remove unnecessary friction from the hire process. Our team is easy to contact, quick to act and focused on keeping your job moving without delays or surprises.

It's all about making equipment hire the easiest part of your project.

QUALITY EQUIPMENT

Reliable equipment is critical to keeping projects on schedule. That's why our fleet is maintained to strict servicing and safety standards, ensuring consistent performance across demanding conditions.

With in-house workshops and experienced technicians, our equipment is regularly inspected, serviced and prepared to meet the expectations of professional operators. This attention to quality reduces downtime and gives every project the best chance of success.

REPAIR & MAINTENANCE

Equipment operating in demanding environments requires consistent, professional support to perform at its best. Yellow Hire maintains a strong in-house repair and maintenance capability to ensure our fleet remains reliable, compliant and ready for work.

Our experienced service team is

equipped to diagnose issues quickly and respond efficiently, whether in the workshop or on site. With scheduled servicing, preventative maintenance programs and thorough inspections, we focus on identifying potential issues early and reducing the risk of unplanned downtime.

This proactive approach allows us to extend equipment life, maintain performance standards and support safer, more efficient operations. For our customers, it means confidence that their equipment is backed by a team who takes responsibility for reliability, not just hire.

HEAVY HAULAGE & LOGISTICS

IN HOUSE HEAVY HAULAGE

Yellow Hire operates a fleet of tilt trays and floats capable of transporting equipment up to 60 tonnes, ensuring safe and efficient delivery across construction, mining, quarrying and agriculture sites. Our transport services are supported by in-house repair and maintenance capabilities, helping keep equipment compliant,

site-ready and moving with minimal disruption.

Whether you're relocating a single machine or coordinating multi-load deliveries, our experienced team and purpose-built vehicles are ready to move equipment with care and precision, on time, every time.

ON TIME, EVERY TIME!

Getting equipment to site when we say we will, is a commitment we stand by. Our dedicated transport fleet, including tilt trays, drop deck trailers and floats, is planned and managed to meet site schedules without delays. When we promise on time, every time, it's backed by reliable logistics and a team focused on keeping your project moving.

OUR EQUIPMENT RANGE

Generators

- 20KVA-1MW+
- Fuel Tanks

Lighting Towers

- LED lighting
- Mobile towers

Telehandlers

- 3-6 Tonne lifting capacity
- Up to 9.5m reach

Skid Steers

- 50-100 HP
- Wheel and Tracked

Excavators

- 1.7-50 Tonne
- Vac Excavators

Wheel Loaders

- 12-32 tonne
- Buckets, forks and jibs

Rollers

- Padfoot, Smooth & Multi Wheel
- Up to 20T

Water Trucks

- 1,200L - 14,000L
- Mine Spec

Tip Trucks

- 2-10 Cubic metres
- Mine Spec

Motor Graders

- 12-14ft blade
- GPS

Dump Trucks

- 20-40 Tonne
- Mine Spec

EWP's

- Boom Lifts
- Scissor Lifts

CAPABILITY THAT STANDS UP

Yellow Hire supports complex projects across Australia, supplying equipment and expertise that holds up under real Australian conditions. Our work spans civil, construction, infrastructure and government projects, partnering contractors who need reliability, scale and experience they can count on.

PROJECTS

ENERGY CONNECT

Yellow Hire supported this regional infrastructure project by supplying a coordinated fleet of earthmoving and support equipment across multiple stages of work. The project required reliable machinery, fast response times and a team that understood changing site conditions and tight delivery windows.

Customer: Elecnor Australia

Location: South Australia & New South Wales

Scope: Construction and upgrade of critical high-voltage substations, including the Buronga substation, which is one of the largest and most complex in the Southern Hemisphere.

Construction of approximately 700km of new 330kV transmission lines. Designed to enable the connection of 4,950MW of renewable energy generation capacity

Equipment Supplied: Excavators, posi tracks, water trucks, tippers, rollers, graders and loaders

Project Value: \$3.6B

“We are in the closing stages of completing the biggest substation in the southern hemisphere. We have worked side-by-side with Yellow Hire from the word go.

It’s a massive achievement for our company to complete the project of this scale.

Yellow Hire have been with us every step of the way. With a quick and reliable service and availability of hire of machines at the drop of a hat.

Also providing excellent service in the case of any breakdowns!

We would highly recommend Yellow Hire and the team!”

*Michael Powell,
Civil Supervisor, Elecnor Australia*

CARWARP SOLAR FARM

The RayGen Power Plant Carwarp Project is a landmark renewable energy development delivering dispatchable, on-demand power to Victoria’s distribution network. Located near Mildura on a site with existing solar approvals, the project represents a significant step forward in large-scale, reliable renewable infrastructure. Yellow Hire supported this project with equipment suited to complex site conditions and the demands of a pioneering energy installation.

Customer: Gransolar Group

Location: Mildura, Victoria

Scope: Construction of a 171 MW solar and hybrid battery farm.

Duration: 2 years

Equipment Supplied: Excavators, posi tracks, water trucks, tippers, rollers and loaders

Project Value: \$233M

“Yellow Hire provided reliable, well-maintained equipment throughout the Carwarp Solar Farm project, supporting the construction of RayGen’s 171 MW solar and hybrid battery facility near Mildura. Their fleet of excavators, posi tracks, water trucks, tippers, rollers and loaders was well suited to the site’s complex conditions, and their service was responsive and dependable across the two-year project duration. We value Yellow Hire as a trusted partner on this landmark renewable energy development.”

*Mick Hicks
Site Supervisor, RayGen*

BALRANALD MINERAL SANDS

The Balranald Mineral Sands Project is a major critical minerals development in south-western New South Wales focused on extracting rutile, zircon and rare earth minerals from a rutile-rich deposit. Approved after rigorous feasibility and environmental studies, the project uses advanced underground mining methods to access deep deposits and is progressing toward commissioning and full production.

Customer: Iluka Resources

Location: Balranald, NSW

Scope: Construction of an onsite processing plant, roads and facilities to produce heavy mineral concentrate (rutile, zircon, synthetic rutile, rare earth concentrate, and sulphate ilmenite).

Duration: 6 years

Equipment Supplied: Excavators, generators, Rollers, fuel tanks and light towers

Project Value: \$124M+
